

README: Skybox AI Sample 360° Images

Introduction

Welcome to this collection of sample 360° images, designed to showcase the capabilities of Skybox AI to generate seamless and immersive visuals. These images demonstrate various use cases and formats, making them ideal for developers, 3D modelers, and other professionals exploring integration into their projects.

File Contents

This download includes three unique 360° images, each available in multiple formats:

Images:

1. **Daytime Sky Scene:** A seamless sky-only scene with no land or environmental features.
2. **Nighttime City Scene:** A vibrant cityscape featuring architectural elements and ground details, both near and far.
3. **Interior Photography Studio:** A professional studio setup with realistic lighting.

Formats:

- **Equirectangular Images:** JPG and PNG formats
- **Cube Maps :** In typical cube map layout and a version specifically formatted for Roblox compatibility
- **32-bit HDRIs:** HDR and EXR formats
- **Depth Map Image:** Captures depth information for advanced use cases
- **3D Mesh:** Includes 3D geometry for enhanced applications

Usage Instructions

- These images are free to use for **personal evaluation purposes** only.
- You may integrate them into your projects for testing or demonstration but not for public distribution.
